OU3 RFI/RI WORKPLANS

EG&G Rocky Flats, Inc. (EG&G) is pleased to transmit herewith four (4) copies of each of the following Phase 1 RI/RFI work plans for Operable Unit 3 sites:

1. Solar Evaporation Ponds,
2. Original Process Waste Lines,
3. West Spray Field, and
4. Present Landfill

Pursuant to the draft Interagency Agreement (IAG), the first three work plans listed above were originally due to the EPA and CDH on April 26, 1990, while the work plan for the Present Landfill was originally scheduled to be submitted on May 7, 1990. DOE, RFO requested an extension for management review and comment correction prior to regulatory agency submittal. CDH granted this request with an extension to May 10, 1990, for the first three work plans, and May 21, 1990, for the Present Landfill. DOE, RFO requested and received verbal approval for a second extension, due to current IAG re-negotiations, to June 8, 1990. Please note that the first extension request was for DOE, RFO management review. Comments from DOE, RFO staff were provided to EG&G informally only, on or before May 15, 1990. DOE, RFO, however, has not provided EG&G official comments regarding or related to these work plans. Consequently, we trust that DOE, RFO will not have any further comments to make to these work plans at this time.

We are coordinating delivery of these documents to the regulatory agencies with Scott Grace of the DOE, RFO staff. If you have any questions, please contact Tom Greengard of my staff at X7121.
